Re: SIP School at the MN State Fair Eco Experience

Greetings,

Once again we are pleased to announce that the SIP School will be offering a training session for builders, architects, designers, inspectors and others interested prior to the setup of the SIP display for the Eco Experience at the MN State Fair. The design focus for this year's Eco House is a net zero residence for urban and rural sites.

While we can handle a large group for the one day classroom on July 27, the number of individuals for the hands on portion of the training on July 28 & 29 will be limited so please sign up as soon as possible if you are interested in the full three day class.

The July 27-29 Minnesota class page is up on the website

[http://www.sipschool.org/newClass.asp?class\\_id=38&article\\_id=1428](http://www.sipschool.org/newClass.asp?class_id=38&article_id=1428)

To help track registrations, please select Curt Stendel, Panelworks Plus as a choice in the field: "How did you hear about SIPschool?" on the registration form.

If you have any other questions, please call me at 763-360-3694.

We are looking forward to seeing you at the SIP School.

Curt Stendel
